

## E.M.F POLLUTION

# Protect your family

## A SIMPLE SOLUTION

Electro-magnetic (e.m.f) pollution is the radiation emitted from our electrical equipment and the cables that supply them. Andrew Weil, M.D. author of Spontaneous Healing and 8 Weeks to Optimum Health, says that "electromagnetic pollution (produced by EMF) may be the most significant form of pollution human activity has produced in this century, all the more dangerous because it is invisible and insensible." Research shows that these fields have a disruptive effect on the energy levels of your body. You have to expend energy to counter the high frequencies of EMF. This can magnify your body's "Fight or Flight" responses, compound your adrenal loads from other stressors, and significantly reduce your ability to function effectively. This can also impair your body's natural ability to heal.

The **Negator** moves so much subtle (life) energy that it creates a large energy field around itself. A geopathic stress consultant has verified that a **Maxi Breeze Negator** has a field of about 8 metres and that this interacts with any radiation (both e.m.f and geopathic stress), protecting anybody inside it from any negative effects (the **Mini Breeze's** field is about 3 metres).

## TESTIMONIALS

"All her life and specially since being treated for cancer over 5 yrs ago my wife rarely had a full night's sleep. When she did, she would still not feel properly rested in the morning. When I put our Negator next to her bed she slept right through the night and awoke feeling completely rested. This has continued since we have had it." *George O., Auckland.*

"Since buying a Negator my son's mood swings have improved dramatically. Also, the house is noticeably more harmonious, I am sleeping better, and have more energy." *Joyce B., Northcote.*

"At my place of work we were all girls, some with a lot of negativity. Since having my Negator at work it has created a more balanced environment. I now enjoy going to, and working in my office". *Judy S., Waimatuku.*

"I have slept like a baby since we placed it in our bedroom and can hardly stay awake. I am out like a light as soon as my head touches the pillow and I don't wake up until the alarm goes off next morning!!" *Chris H., Hamilton.*

Dear David & Margie, My partner and I have had wonderful success with our Negator. We live in a large caravan and are travelling around the country, the Negator helps keep the energies in the caravan balanced no matter where we are parked and we are both sleeping 100% better now. Thank you. *Sue T., New Zealand.*

"Hi David, my Negator is helping me with sleeping mainly. I was having really bad nightmares and since having my Negator I haven't had one except one night when I went away, I won't be leaving it at home again." *Danielle H., Hamilton, N.Z*

## PRODUCTS:

**Maxi Breeze** containing one large quartz terminated crystal and 4 tumbled crystals (various—each one unique). Powerful enough to balance a whole house and some of the neighbourhood! Approx. height 12 cm.

**Mini Breeze** containing a quartz terminated crystal and 2 tumbled crystals (various) this will balance a room or personal space—ideal for sitting on the desk-top and protecting you from the e.m.f from the computer. Approx. height 7cm.

This technology is not intended as a substitute for medical advice.

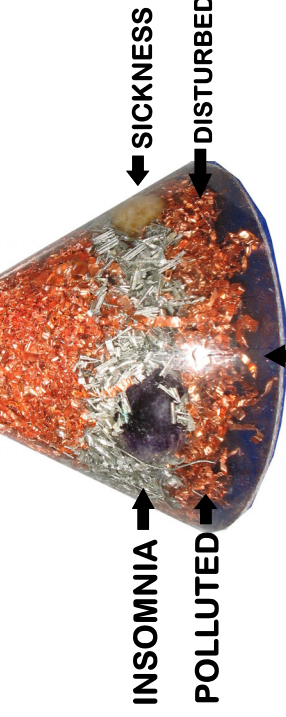

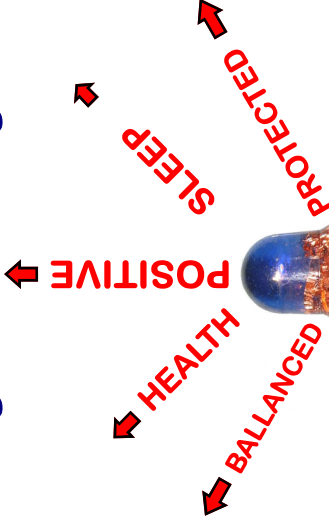

THE

# NEGATER®

## NEGATIVE ERADICATOR

## ENERGY BALANCER

*Healing Lives—Energetically*

## NEGATIVE

## Testimonial.

I am overwhelmed with the affect the Maxi-Breeze has had on my life since purchasing from you. It is an absolute blessing to be experiencing night after night of resting sleep. Additionally, negative thoughts are a thing of the past for me, and the same affect has been achieved in my work environment since standing a Negator there. *John H. Christchurch N.Z*

**All Negaters are individually hand-crafted with love ☺**

© Life-Energy Designs 2005

## WHAT DOES IT DO?

- Strongly pulls energy into & through itself.
- Converts any negative energy to positive (unbalanced to balanced)

### Consequently it can

- Cleanse the human aura / energy field.
- Promote good health / Healing
- Amplify healing energy
- Promote balance / harmony in any situation
- Heal a sick building / room / space
- Awaken spiritual awareness
- Protect an area from any unbalanced entity / being
- Clean crystals
- Energize water / food

### As a by-product of its energy field it can

- Provide protection from E.M.F emissions from computers / elec. equip.
- **Promote peaceful sleep (near the bed)!**
- *This list is growing as more people explore this technology !*

### Ultimately they will

- Positively effect your life and those within its field of operation.
- Collectively help transform this world into a better place to live in.

### We genuinely believe

This exciting technology presents a most powerful tool in the struggle for personal & world transformation today.

## HISTORY

Wilhelm Reich (1897-1957) was the first well-known scientist of our age to publicly quantify and experiment with life-energy, which he called ORGONE.

“Orgonomy is the scientific study of orgone (life energy) energy in living organisms, the earth, and the atmosphere as well as outer space. Orgone energy is best described as a pre-atomic (mass-free) energy. Its natural flow is vital to a healthy individual as well as life on earth. “

Reich invented a device that he called an “Orgone Accumulator”. Basically it used a multi-layered sandwich of metal and organic material that acted as a lens, focussing orgone energy on a person or object. These are still available today but have a disadvantage in that they will focus negative orgone or DOR (Deadly Orgone, as Reich called it) just as well as positive (POR).

Don Croft, an American, discovered that the same effect could be achieved by putting metal particles in a resin form and that by adding crystals it would CONVERT the negative to positive energy as it was pulled through the device.

## WHAT’S IN IT?

Each Negater contains a terminated quartz crystal and either 4 or 2\* tumbled crystals (various— each one is unique) These are set in a resin and metal particle matrix and capped with a glass sphere. \*depends on model/size.

## HOW IT WORKS

The metal attracts the energy and then releases it to the organic resin from where it is attracted into another piece of metal and so on moving through and into the material. Any negative/unbalanced energy is transformed by the crystals. When the Negater is fully charged energy starts to overflow out into the surrounding space. The glass sphere is great at distributing this evenly in all directions.

## WHY HAVEN’T I SEEN IT BEFORE ?

These devices have been sold to a limited market in America and worldwide over the internet. We discovered this technology over 4 years ago when we lived in Kenya. We made and deployed several devices to heal the bad energy left over from the Arab slave trade and the stain of human suffering in the place where we lived, the resulting transformation convinced us that we needed to contribute in the promotion of this technology. When we arrived in New Zealand in Early December 2003 we started to develop and test our own designs which we are pleased to be able to share with the discerning people of New Zealand and beyond.

## INSOMNIA:

-the inability to get a good, restful night’s sleep-affects most people at some time in their lives. For others, it is a constant and life-limiting burden. Restless and fraught hours at night lead to less fulfilled daily lives.

### Desperate!

This forces many to resort to desperate measures such as sleeping pills thus exposing people to harmful side effects without offering them a lasting solution.

### A Solution

There is a solution! It is an energetic remedy at the cutting edge of frontier science.—The **Negater**. **It requires:**

*No drugs. No medication of any kind (herbal or otherwise). No exercises. No movement of furniture. Only the placement of an attractive **Negater** near the bed. (normal preventative measures need to be observed, of course).*

### What it does

Negaters work two ways against insomnia. Firstly, they work energetically to bring the body into balance— working against any sleep depriving stress or anxiety (this can be enhanced by holding your Negater for some time prior to retiring).

Secondly, they protect against e.m.f pollution. See *next page for how this works*. The stress caused by e.m.f and geopathic stress pollution can, at worst, cause serious illness like cancer. A less dramatic, but deeply disturbing consequence is **INSOMNIA**. Being protected by a **Negater** blocks the effects of this radiation, so allowing people to sleep peacefully. Many people without insomnia have reported that their sleep patterns deepen for more restful sleep.

### Is this a solution for you or your loved-one?

Nobody can be a 100% sure (there are undoubtedly other reasons for insomnia). If it is the solution for you or your loved-one we want you to be able to try it **RISK FREE**. To this end, we will offer you a **MONEY-BACK GUARANTEE**. If, after 2 months trial it doesn’t solve the problem, we will give you a complete refund – no questions asked.

**How to use it:** Try it next to the bed. Allow up to four days to acclimatise yourself to its energy. If, after this time, you feel that the energy is too much for you try moving it farther away, experimenting with different locations in the room until it feels comfortable.
